IRIS Instruments: geophysical equipment for exploring and monitoring the Earth's resources

Groundwater exploration

Geotechnical studies

Archaeological investigation

Environmental surveys

Mineral exploration

Your applications:
Environment / Pollution
Water resources
Civil Engineering,
Archaeology
Mining exploration

IRIS Instruments: geophysical equipment for exploring and monitoring the Earth's resources

Our activity:

Design, production, sale of geophysical equipment

Your applications:

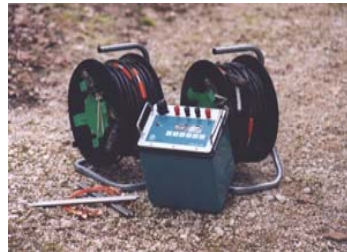

*Environment / Pollution
Water resources
Civil Engineering,
Archaeology
Mining exploration*

Our product ranges:

*Equipment for electrical sounding and imaging
Equipment for Magnetic Resonance sounding
Transmitters and receivers of Induced Polarization
Electromagnetic equipment*

Electrical sounding

Resistivity imaging

Magnetic Resonance

Induced Polarization

Our offer:

*Sale of products
Interpretation software
Rentals
Training / installation
Maintenance*
