

TRAININGS FOR ALL OUR EQUIPMENTS AT CUSTOMER'S SITE OR IN OUR OFFICE

STANDARD TRAINING PROGRAMS

- ✓ Standard resistivity (sounding & profiling)
- ✓ Resistivity imaging
- ✓ Induced polarization
- ✓ Electromagnetic profiling
- ✓ Magnetic resonance sounding

WE ADAPT STANDARD TRAINING

We adapt the training according to your initial knowledge and to your needs. IRIS Instruments can provide training all over the world at customer's site or in our premises in Orléans, France (2 hours from Paris).

We adapt the training program and duration (mainly 3 to 5 days) and do not limit the number of attendees (if it remains reasonable).

Standard training alternates between training in the classroom and on the field but can be done in the field only.

Specifications subject to change without notice BR_IRIS_TR_GB_V1
